
PRACTICE AREAS & TECHNOLOGIES

LAN & WAN: Design, implementation, upgrades

Centralized Storage: Design, implementation, upgrades for SAN, NAS and iSCSI

Information Security: Design, authentication, auditing, encryption, VPN, proxy, anti-virus/malware

Disaster Recovery: DR planning and Business Continuity

Virtualization: Design, implementation, upgrades

Tape backup & libraries: Design, implementation, upgrades

System Management: Inventory, license utilization, image & patch distribution

Wireless: Wi-Fi design, implementation, security integration

High-availability: Design, implementation for server or network infrastructure

Messaging: Design, implementation, upgrades, archiving, anti-spam

Technical Writing: Assessment, Capacity Planning, IT policies & procedures, documentation

Project Management: Planning, organizing and managing resources

Microsoft:

- Active Directory
- Exchange 2010
- MS SQL
- Sharepoint
- Clustering
- Windows 7
- Windows 2008 Server & Windows 2008 Server Hyper-V

Cisco: routers, switches, firewalls, wireless and security appliances

Citrix: PS 4.x and XenApp v5 & 6

VMware: ESX and ESXi

Symantec: Backup Exec
